

Build Your Own Space Capsule: Design Requirements

Your Space Capsule Must:

1. Hold three paper astronauts

2. Allow astronauts to be comfortable and eat meals

3. Protect the astronauts while in space

There are many different ways to achieve these three goals.

Be creative!

Build Your Own Space Capsule: Space Capsule Examples

You can use the following materials to build your capsule:

- Cardstock
- Foam Stickers
- Twistable Wire
- Clear Plastic
- Tape
- Markers
- Cardboard Shapes
- Plastic Cups
- Glue Sticks
- Scissors
- Tinfoil
- Recycled Cardboard

Here are some examples of space capsules:

Try not to copy these designs exactly. Instead, use your own ideas to create something brand new!
